HCIA-AI V4.0 Exam Outline

HCIA-AI V4.0 Certification Exam

Exam Name	HCIA-AI
Exam Code	H13-311
Language	Chinese/English
Question Type	True or false question, single-choice question, multiple-choice question, and fill-in-the-blank question
Exam Fee	200USD
Exam Duration	90 min
Pass Score/Total Score	600/1000

Exam Content

The HCIA-AI V4.0 exam covers AI overview, basics of machine learning, basics of deep learning and foundation models, AI development frameworks, AI Business Process Overview, and cutting-edge AI applications.

Knowledge Point Percentage

Key Points	Percentage
AI Overview	10%
Machine Learning Overview	20%
Basics of Deep Learning and Foundation Models	30%
AI Development Framework	20%
AI Business Process Overview	15%
Cutting-edge AI Applications	5%

Key Points

- AI Overview
  - AI Description
  - AI Technologies
  - Overview of DeepSeek and Its Influence on AI Development
  - AI Applications
  - Disputes and Future of AI
- Machine Learning Overview
  - Machine learning Algorithms
  - Machine Learning Classification
  - Machine Learning Process

- Other Key Machine Learning Methods
- Common Machine Learning Algorithms

- Basics of Deep Learning and Foundation Models
  - Perceptron
  - Fully-connected Neural Network and Its Training Process
  - Convolutional Neural Network
  - Model Architecture Based on Recurrent Neural Network
  - Transformer Architecture
  - Foundation Model Infrastructure
- AI Development Framework
  - AI Framework
  - Basics of AI Development Framework
  - PyTorch
  - AI Application Development Process
- AI Business Process Overview
  - AI Business Process
  - Large Model Business Process
  - Use of Large Models and Prompt Engineering
- Cutting-edge AI Applications
  - Voice assistants
  - Smart Homes
  - Intelligent Vehicles
  - Intelligent Recommendation
  - Intelligent Robot
  - AI4Science

NOTE

The test content mentioned in this document provides a general test guide for candidates. Others not mentioned in this document may also be included in the exam.
